Account abstraction

Copy page

Account abstraction providers on Arc, offering SDKs, paymasters, and smart wallet infrastructure for building flexible AA flows.

Account abstraction (AA) replaces externally owned accounts (EOAs) with smart contract wallets that support programmable transaction validation, gas sponsorship, and batched operations. Arc supports the ERC-4337 standard, so you can use any compatible bundler, paymaster, or SDK from the providers below.

Providers

Biconomy

Account abstraction toolkit offering modular smart accounts, paymasters, and bundlers as a service to simplify the user experience.

Blockradar

Infrastructure and APIs for smart account management and transaction bundling, enabling scalable AA flows with minimal setup.

Circle Wallets

End-to-end platform for creating and managing secure Arc wallets and cryptographic keys. Supports ERC-20, ERC-721, and ERC-1155 standards.

Crossmint

Wallet-as-a-service and AA capabilities to onboard users with email or OAuth-based accounts.

Dynamic

Identity and wallet orchestration platform with native ERC-4337 support, enabling passkey wallets and flexible signer management.

Para

Wallet and authentication suite for fintech and crypto applications, enabling flexible wallet management and transaction signing.

Pimlico

Bundler and paymaster infrastructure for ERC-4337 smart accounts, offering sponsored transactions and reliable relay services.

Privy

APIs and SDKs for embedded wallets and user authentication. Onboard users with email or social logins while maintaining full control over key management.

Thirdweb

Full-stack toolkit with built-in AA support, SDKs, and a managed smart wallet layer.

Turnkey

Programmable key management API enabling secure, policy-based smart account control and AA wallet creation.

Zerodev

Developer SDK for deploying and managing ERC-4337 smart accounts, with built-in session key and bundler support.

> Arc's account abstraction ecosystem is modular — you can mix SDKs, paymasters, and bundlers from multiple providers to design your smart account architecture.
