Connect to Arc

Copy page

Connect your wallet or app to the Arc chain network.

Network details

Arc testnet

Name	Value
Network	Arc Testnet
RPC endpoint	`https://rpc.testnet.arc.network` Alternatives: • `https://rpc.blockdaemon.testnet.arc.network` • `https://rpc.drpc.testnet.arc.network` • `https://rpc.quicknode.testnet.arc.network`
WebSocket	`wss://rpc.testnet.arc.network` Alternatives: • `wss://rpc.drpc.testnet.arc.network` • `wss://rpc.quicknode.testnet.arc.network`
Chain ID	5042002
Currency	USDC
Explorer	`https://testnet.arcscan.app`
Faucet	`https://faucet.circle.com`

Wallet setup

Add Arc testnet

1. Open MetaMask → **Add network** → **Add a network manually**.
2. Fill in:

Field	Value
Network name	Arc Testnet
New RPC URL	`https://rpc.testnet.arc.network`
Chain ID	5042002
Currency symbol	USDC
Explorer URL	`https://testnet.arcscan.app`

3. Save, then switch to Arc.

> If your wallet supports **custom gas tokens**, ensure display/decimals for USDC (18 decimals) and clearly label fees as USDC.

Gas and fees

Arc uses USDC as the native gas token. For details on gas configuration and the current base fee policy, see the **Gas and Fees** page.
